

JOVANNAH A. MOXEY

2811 Isleville Street, NS B3S 1B3 | +1 7827746884 | jov.mox@live.com

EDUCATION

Saint Mary's University | *Bachelor of Computer Science, Computer Science*

Sep 2021 - Aug 2026

Queen's College | *High School Diploma*

Jan 2013 - May 2019

SKILLS

- **Skills:** Technical Problem Solving & Troubleshooting, Technology Fluency & Product Knowledge, Customer Service & Solution Delivery, Collaboration & Communication
- **Programming & Web Development:** Java, Python, HTML, PHP, CSS, JavaScript, React, Git
- **Data Analysis & Workflow Efficiency:** Microsoft Excel
- **Databases:** SQL, Databases

WORK EXPERIENCE

Apple | *Apple Specialist*

Jul 2025 - Jan 2026

- Delivered personalized technology solutions to over 200 customers per week, troubleshooting setup needs and configuring Apple devices tailored to each customer's requirements.
- Consistently achieved or exceeded sales and customer-satisfaction targets, contributing to overall store performance.
- Built lasting customer relationships, leading to repeat visits and positive feedback scores.
- Applied detailed product knowledge to provide accurate, timely guidance on Apple products and services, helping customers make informed decisions.
- Collaborated with teammates to resolve customer needs and maintain a welcoming, inclusive atmosphere in a fast-paced retail environment.

Multimedia Technologies | *Applications/Software Technician*

May 2023 - Aug 2023

- Managed and updated software applications, troubleshooting functionality issues to support reliable performance and a positive user experience.
- Assisted in installing and configuring advanced audio/visual technology for client solutions.
- Delivered exceptional customer service by addressing technical inquiries and ensuring satisfaction with provided services.

PROJECTS

Database Systems | *Saint Mary's University*

Jan 2025 - Apr 2025

- Applied SQL and MongoDB for data querying and management, building proficiency across relational and document databases.
- Learning relational database design, normalization, indexing, and transaction management.
- Designing and optimizing database schemas and queries to improve performance and data integrity

Nourished Notes Website (Full-Stack Web Application) | *Saint Mary's University*

Jan 2026 - Apr 2026

- Developed a dynamic full-stack website using PHP, MySQL, JavaScript, HTML, and CSS, implementing 10+ interconnected pages with reusable components to improve code maintainability.
- Built a secure user authentication system (login/registration) with encrypted passwords and session management, enabling persistent user interactions.
- Designed and integrated an e-commerce workflow (product catalog, shopping cart, checkout) backed by a MySQL database, supporting real-time inventory handling.
- Enhanced user experience by implementing AJAX-based live updates and MongoDB-powered dynamic content, including daily quotes, reducing page reloads and improving interactivity.

Woodland Conservation Website | *Saint Mary's University*

Sep 2023 - Dec 2023

- Designed and developed a website for a conservation site, integrating a GPS tracking feature that provided users with detailed information about trees and locations on-site.
- Implemented innovative features such as "Talking Trees," which narrated tree details to users via their mobile devices, and accessibility features tailored for hearing- and vision-impaired users.
- Developed a digital signature feature allowing visitors to leave personalized notes, share their experiences on social media, and promote awareness of the conservation site.

EXTRACURRICULAR

ANFGC | *Lighting Engineer*

Jan 2021 - Present

- Installed, maintained, and operated lighting equipment and consoles for live performances, broadcasts, and recordings to deliver precise visual effects at ANFGC in Halifax
